

## CAREER PROFILE

Experienced technology professional with a robust background in designing, implementing, and managing advanced technology solutions, with a specialized focus on data security and governance. Proficient in aligning systems with security frameworks such as PCI DSS, GDPR, HIPAA, and ISO 27001 to ensure compliance, protect sensitive information, and mitigate risks. Renowned for technical precision, efficient project execution, and innovative problem-solving that strengthen company tech infrastructure and security posture.

- Expert in systems architecture and network management
- Highly skilled in DevOps and automation (Docker, Kubernetes, Terraform, Helm, CI/CD pipelines)
- Proficient in data security frameworks (PCI DSS, GDPR, ISO 27001) and implementing governance practices
- Strong in CLI across all operating systems (Linux, Mac, and Windows)
- Skilled in cloud solutions including Azure, AWS and GCP, with a security-first approach
- Proficient in server administration and virtualization for resilient and scalable environments
- Advanced in cybersecurity practices, vulnerability management, and compliance strategies
- Proven leader with a collaborative mindset, driving cross-functional teams to achieve goals
- Exceptional analytical and troubleshooting skills for complex technical and security challenges
